

HEARING EXHIBIT NO. 16

(Merits Hearing of 4/3-4/2018)

In the matter of Docket No. 2017-292-WS:
Application of Carolina Water Service, Incorporated,
for Approval of an Increase in Its Rates
for Water and Sewer Services

I hereby certify this document to be a
true copy of the original.

Jacelyn Boyd

Chief Clerk

Date 8/30/18

AUDIT REQUEST #30

ORS AUDIT DEPARTMENT REQUEST FORM

Carolina Water Service, Inc.

Docket No. 2017-292-WS

Please acknowledge receipt of request by email.

DATE: March 14, 2018

TO: Michael Cartin

FROM: Zac Payne

AUDIT PURPOSE: I-20 Litigation Costs

REQUEST THE FOLLOWING ITEMS BE PROVIDED BY: 3/19/2018

REQUEST DESCRIPTION:

Please provide the most recent total of I-20 litigation costs that CWS is seeking amortization of in this docket. Provide the GL and all invoices supporting this total.

Response: Provided hard copies to be picked up when finished reviewing.

Further, identify specifically all legal defense cases for which these costs were incurred, and provide a brief description/background for each. Provide a breakdown showing how much of the total litigation costs are attributable to each case you have identified.

Response: Below is a summary of all legal defense cases for which these costs were incurred with a brief description/background.

1. CRK v. CWS – Action brought in federal court against CWS for injunctive relief to stop the discharge into the Lower Saluda River from the I20 system and alleging violations of the permit.
2. Town of Lexington v. CWS – Town's condemnation proceeding for the I20 system
3. ALC – review of DHEC's denial of our permit renewal for the I20
4. ALC – Town's challenge of the DHEC order relating to the I20 connection
5. CWS v. EPA, Town of Lexington – Federal Court action CWS brought against EPA and Town of Lexington requesting an injunction to compel the Town connect the I20 to the system or declare the Town's contract with Cayce invalid for its interference with the Town's obligations as DMA under the 208 plan

Of the costs that CWS is seeking amortization of in this docket \$925,886.54 is associated with cases 1,3,4, and 5 above all regarding I-20 Litigation Fees. This is referencing all costs from August 2017 back to the last rate case and using an approximation of 20% of Willoughy and Hoefer invoices provided after that date.

Roughly 80% of John Hoefer's time was spent working on the condemnation case after receiving the notice of condemnation. In reference to the condemnation proceeding the Company is seeking amortization expense for \$72,719.60 of legal fees.

Please let me know if you need more detailed information. Thanks.

CONGAREE RIVERKEEPER, INC.,) Civil Action Number: 3:15-cv-00194-MBS
)
Plaintiff,)
)
vs.) **ORDER AND OPINION**
)
CAROLINA WATER SERVICE, INC.,)
)
Defendant.)

On August 1, 2016, the South Carolina Department of Health and Environmental Control (“DHEC”) denied Defendant’s permit renewal request. ECF No. 64-1. On September 7, 2016, the court issued a text order requiring each party submit a supplemental brief on the impact of DHEC’s decision to deny the permit renewal on the present case. Both parties asserted that DHEC’s decision not to renew does not affect the current case. ECF No 64 at 5 (Plaintiff’s supplemental brief); ECF No. 65 at 1 (Defendant’s supplemental brief).

1

I. FACTUAL AND PROCEDURAL BACKGROUND

Central Midlands Counsel of Governments (“CMCOG”) is tasked with conducting water quality planning and management for the Midlands region of South Carolina. *See* ECF No. 58-1 at 3-4. The Town of Lexington (“Town”) falls within the Midlands region and was chosen as the Designated Management Agency (“DMA”) and regional provider of wastewater collection by the CMCOG, in consultation with the governor, pursuant to 33 U.S.C. § 1288(a). ECF No. 58-1

Defendant owns and operates a WWTP in Lexington County, South Carolina, known as the I-20 Plant. *Id.* DHEC issued NPDES Permit No. SC0035564 (“the Permit”) to Defendant on November 17, 1994, (effective January 1, 1995). ECF No. 57 at 4. The Permit was modified in April 1996 and was due to expire on September 30, 1999. ECF 57-1. The Permit authorizes Defendant to discharge wastewater from the I-20 Plant into the Lower Saluda River subject to effluent limitations and monitoring requirements. Importantly, the Permit provides that “[i]n accordance with the [208 Plan], the [I-20] facility is considered a temporary treatment facility that will be closed out when the regional sewer system is constructed and available.” ECF No.

Page 3 of 31

57-1. Defendant's permit was to expire when the regional system received its permit to operate.

Id.

On April 7, 1999, Town completed construction on the regional sewer line and received a Permit to Operate from DHEC. ECF No. 58-1 at 6. On April 21, 1999, DHEC informed Defendant and Town that the regional system received its permit to operate and that Defendant's construction permit to connect to the regional system was approved. ECF Nos. 65-4, 65-5. Town and Defendant were unable to agree on the terms of a connection. ECF No. 65 at 2. Defendant never constructed the pipeline to connect to the regional system. *Id.* On July 16, 1999, and August 24, 1999, Defendant sought a major modification to the Permit that would allow the I-20 Plant to continue operating indefinitely as Defendant negotiated with Town and sought PSC approval to connect to the regional system. ECF 61-2 at 24–25. DHEC denied Defendant's major modification requests on the basis that Defendant did not provide good cause for its requests. ECF 61-4 at 2. In February 2000, DHEC found that Defendant was in violation of the Permit due to Defendant's failure to connect to the regional system and for exceeding permitted discharge levels. ECF No. 61-5. In February or March 2000, Defendant appealed denial of the modification, denial of permit reissuance, and issuance of violations to the ALC. *See Carolina Water Service v. S.C. Dept. of Health and Environ. Control*, No. 99-ALJ-07-0450, 2002 WL 385126 (S.C. Admin. L. Judge Div. Feb. 25, 2002) [hereinafter 2002 ALC Decision].

In July 2000, DHEC and Town entered into an agreement that (1) noted Town's regional system had insufficient capacity to handle the wastewater from Defendant's system, (2) noted PSC must approve any agreement between Town and Defendant, and (3) required Town to offer Defendant a contract by August 5, 2000. ECF No. 65 at 3. Town and Defendant came to an agreement and submitted said agreement to PSC (Docket No. 2000-425-S); however, Defendant

withdrew the agreement from consideration in January 2001 pending consideration of Defendant and Town's joint amendment to the 208 Plan. *Id.* The amendment from Defendant and Town proposed that the I-20 Plant be designated as a permanent treatment facility and not be required to connect to the regional facility. *Id.*

On March 22, 2001, CMCOG approved the joint amendment to the 208 Plan. ECF No. 58-1 at 7. However, DHEC refused to certify the amendment. ECF No. 58-1 at 7. In August 2001 Defendant, Town, and CMCOG filed a petition in the ALC protesting DHEC's refusal to certify the proposed amendment. The Lexington County Joint Municipal Water and Sewer Commission intervened. *See CMCOG v. DHEC*, Nos. 01-ALJ-07-0363-CC, 01-ALJ-07-0364-CC, 01-ALJ-07-0365-CC, 01-ALJ-07-0433-CC, 2002 WL 31716469 (S.C. Admin. L. Judge. Div. Oct. 22, 2002).

On February 25, 2002, the ALC issued a decision on Defendant's appeal of DHEC's denial of the modification, denial of permit reissuance, and issuance of violations. The ALC deferred to CMCOG's finding that Defendant was in conformance with the NDPES permit until February 24, 2000, because the regional system was not available for connection. *Carolina Water Service*, 2002 ALC Decision at *4, *6. Further, the ALC modified the permit compliance schedule requiring Defendant connect to the regional system. *Id.* at 9. Essentially, the ALC ordered that Defendant was under an "on-going obligation to negotiate an agreement and to continue to seek an agreement between [Defendant] and [Town] that will be approved by the PSC." *Id.* at 10. The order then states specific timeframes if PSC approves of an agreement. Alternatively, the ALC held that if PSC denies the connection agreement, then the permit will expire after one hundred-eighty days of the final PSC Order. *Id.*

Defendant and DHEC both appealed to the DHEC Board. *Carolina Water Service v. S.C. Dep't of Health and Environ. Control*, No. 99-ALJ-07-0450, ECF No. 16-3 (DHEC Board Order

March 15, 2004) [hereinafter 2004 Board Order]. The DHEC Board reversed the ALC's holding that Defendant's permit would expire one hundred-eighty days after a PSC denial but otherwise affirmed the ALC's amended schedule to connect to the regional system—including Defendant's on-going obligation to negotiate with Town for an acceptable contract. *Id.* at 5.

In 2002, Defendant submitted the 2000 interconnection agreement to PSC for approval, with modifications to the customer rate. PSC refused to approve the interconnection, finding the proposed agreement against the public interest. *In re Application of Carolina Water Service*, No. 2002-147-S, 2003 WL 26623818 at *5 (S.C.P.S.C. 2003). PSC found that Defendant agreed to pay too high a rate for the service received and Defendant's customers, in effect, would subsidize the regional system. *Id.* at 6. PSC denied Defendant and Town's alternative plan, which would sell one of Defendant's other facilities and designate the I-20 Plant as a permanent treatment facility. *Id.*

In August 2009, the City of Cayce, Town, and the Lexington County Joint Municipal Water and Sewer Commission entered into a contract to expand the capacity of the Cayce regional treatment plant. *See* ECF No. 58-3. The construction of the expansion was financed through issuance of tax-exempt bonds with restrictive covenants designed to preserve the bonds' tax-exempt status.³ ECF No. 58-3 at 38–39. One condition is a restriction on the amount of wastewater from “Private Business Use” that can be treated. *Id.* “Private Business Use” includes a private utility like the I-20 Plant. *Id.*; *see also* ECF No. 58-1 at 9. Town covenanted that it would not enter into any contract or agreement for sale of its wastewater services or allocated capacity that constitutes a “Private Business Use.” ECF No. 58-3 at 39. If Town contracted with another party for activity that constituting “Private Business Use,” the contract “may cause the

³ As this was in 2009, Town knew of Defendant's requirement to connect to its regional system.

interest on [b]onds to be included in the gross income of the holders,” thereby, extinguishing the bonds’ tax-exempt status. *See* ECF No. 58-3 at 38.

Defendant did not engage in negotiations with Town after the denial by PSC in 2003 until 2014, after Plaintiff served its notice of intent to sue under the CWA. *See* ECF No. 58-1 at 8. In July 2012, Defendant again inquired into making the I-20 Plant into a permanent facility and stated to DHEC that it had not had “any recent discussions with [Town] about hooking up to [the regional] system.” ECF No. 57-4.

On November 6, 2013, Plaintiff served on Defendant and DHEC notice of intent to sue under the CWA. ECF No. 58-1 at 10. Plaintiff asserted that Defendant was in violation of NPDES Permit SC0035564 since it has failed to eliminate its discharge into the Saluda River. ECF No. 58-1 at 10.

On March 21, 2014, Defendant initiated negotiations with Town regarding a possible connection to the regional system. No. 58-5. On May 8, 2014, Town responded that it was not interested in an interconnection at the time. ECF No. 7-10.

On July 31, 2014, Defendant and Town entered into a confidentiality agreement to negotiate a sale of the I-20 Plant. ECF No. 58-6. Town was interested in acquisition of the I-20 Plant only if it also acquired another facility owned by Defendant, the Watergate system. ECF No. 58-7. Before engaging in further negotiations Defendant requested a non-binding letter “indicating that a \$13.5 Million price is within a reasonable range of value that the Town would be willing to consider paying.” *Id.* Town declined to enter into a non-binding letter of agreement, stating it was unable to determine if that price was within a reasonable range without other information. ECF No. 58-7. Defendant provided Town with maps of the system, as requested. ECF No. 58-7. In December 2014, Defendant provided Town with additional information on the

number of customers, yearly revenue, yearly costs, and other data. ECF No. 58-8. Town did not respond to Defendant about the proposed price and did not make an offer for the systems. ECF No. 58-1 at 11.

In July 2015, Defendant submitted a draft permit renewal to DHEC, which sought to add that “[t]o connect to the Town DHEC recognizes that [PSC] must approve an agreement related to connection to the regional sewer line.” ECF No. 65-8 at 34. DHEC issued a fact sheet noting that Defendant would need PSC approval and that DHEC does not have the authority to force Defendant and Town make a connection agreement. *Id.* at 41. On August 25, 2015, DHEC held a public hearing to elicit public feedback on Defendant’s permit renewal request. ECF No. 65 at 7. Approximately 285 individuals attended the hearing, including numerous public officials. ECF No. 64 at 3. Almost all attendees advocated for denial of the renewal permit. *Id.*; ECF No. 58-18 at 4.

On September 3, 2015, Defendant unilaterally filed an application with PSC seeking approval of an interconnection agreement at the wholesale treatment rate Town charged Defendant for another system. ECF No. 34-1 (PSC Docket No. 2015-327-S). Defendant did not seek Town’s approval before submitting the application. ECF No. 58-10 at 2.

On September 4, 2015, DHEC issued a notice of intent to deny the renewal permit. ECF No. 33-1 at 1. DHEC determined Defendant was ineligible for a permit renewal because Defendant’s permit required Defendant to connect to the regional system once the system was operational and Defendant failed to do so. ECF No. 33-1 at 1.

On September 9, 2015, Defendant sent Town a letter requesting interconnection on the terms set forth in the September 3, 2015, application. ECF No. 58-9. Town declined any interest in an interconnection agreement as the terms did not accurately reflect current costs. ECF No.

does not weigh evidence but determines if there is a genuine issue for trial. *Anderson v. Liberty Lobby*, 477 U.S. 242, 249 (1986). The party seeking summary judgment bears the initial burden of coming forward and demonstrating an absence of a genuine issue of material fact. *Celotex Corp. v. Catrett*, 477 U.S. 317, 323 (1986). Once the moving party has met its burden, the nonmoving party must affirmatively demonstrate that there is a genuine issue of material fact for trial. *Matsushita Elec. Indus. Co. Ltd. v. Zenith Radio Corp.*, 475 U.S. 574, 587 (1986). The court should grant summary judgment if a party fails to “establish the existence of an element essential to that party’s case, and on which that party will bear the burden of proof at trial.” *Celotex Corp.*, 477 U.S. at 322.

III. ANALYSIS

Plaintiff moves for summary judgment on Claims I and III. Plaintiff argues that there is no genuine issue of material that (1) Plaintiff has standing to sue, (2) Defendant was required to connect to the regional treatment facility under the 1994 Permit, and (3) Defendant violated the effluent limitations requirement on twenty-three occasions. Defendant moves for summary judgment on Claim I. Defendant claims there is no genuine issue of material fact that (1) Plaintiff lacks standing, (2) Plaintiff is barred by the statute of limitations, (3) the 2002 modifications to the permit apply and Defendant is in compliance with the modified terms, or if the 1994 Permit applies, Defendant is in compliance with the 1994 Permit as well. Defendant argues there is a genuine issue of material fact whether it has an “upset defense” to its effluent limitations violations.

ADCEFEFRBNLEARLPRLQCHSSZNOGB-MAHKAABWU\$1.130.5M 1 80P-SGCFBOKKKA# 2 02922025 WBAgca4guc266cf 7777

relief requested requires the participation of individual members in the lawsuit.” *Am. Canoe Ass’n v. Murphy Farms, Inc.*, 326 F.3d 505, 517 (4th Cir. 2003) (quoting *Hunt v. Wash. State Apple Advert. Comm’n*, 432 U.S. 333, 343 (1977)).

A member has standing to sue in their own right where he or she can establish the three elements of Article III standing: (1) injury, (2) traceability, and (3) redressability. *Lujan v. Defenders of Wildlife*, 504 U.S. 555, 560 (1992). A plaintiff bears the burden of establishing injury, traceability, and redressability. *Id.* at 560–61. Plaintiff asserts that its members have “suffered injuries that are fairly traceable to the discharges from the [I-20 Plant], and a court order would redress these injuries.” ECF No. 57 at 9. Defendant argues that Plaintiff fails to demonstrate that the alleged injuries were caused by Defendant rather than third parties not before the court, Town and PSC. Defendant next argues that Plaintiff fails to demonstrate that its injuries would be redressed by a favorable decision, because redressing Plaintiff’s alleged injury involves third parties, Town and PSC. ECF No. 58-1 at 31–32. For the reasons set forth below, the court finds that Plaintiff’s injuries are traceable to Defendant and can be redressed by this court.

a. Injury

To demonstrate legal “injury,” the plaintiff “must have suffered ‘an injury in fact’—an invasion of a legally protected interest which is (a) concrete and particularized . . . and (b) actual or imminent, not ‘conjectural’ or ‘hypothetical.’” *Lujan*, 504 U.S. at 560 (internal citations omitted). In an environmental case, “plaintiffs adequately allege injury when they aver that they use the affected area and are persons ‘for whom the aesthetic and recreational values of the area [are] lessened’” by the alleged activity. *Friends of the Earth, Inc. v. Laidlaw Environ. Servs. (TOC), Inc.*, 528 U.S. 167, 183 (2000) (stating that plaintiffs who avoid using the portion of the

ADCEFEFBNLEARLPQJHSZNGE-MAHKAABUW\$T130AM 1 PWP-SCHBOKKGA# Z029Z20AS WBAgca66c286f 777

river due to concerns about discharges from the facility sufficiently allege injury). Mere speculative intentions, such as the intent to visit the area “someday” are insufficient to demonstrate a concrete injury. *See Lujan*, 504 U.S. at 564.

Here, Plaintiff’s members specify their use of the river and their attempts to avoid the river in the area of the I-20 Plant discharge pipe. Regan Norris often fishes and kayaks in the Lower Saluda River; however, he tries to avoid kayaking near the discharge pipe and is concerned about eating fish from the river. ECF No. 15-2 at ¶¶ 5–6. Amanda Odum avoids kayaking and canoeing in the Lower Saluda River near the I-20 Plant discharge pipe. ECF No. 15-3 at ¶ 6. Bill Stangler uses the Lower Saluda River but avoids contact with water near the I-20 Plant discharge pipe. ECF No. 15-4 at ¶ 3–4. Hartley Barber owns a tour guide company that provides guided tours of the Lower Saluda, and tells clients to avoid that section of the river when the pipe is discharging wastewater. ECF No. 15-5 at ¶¶ 3–5. Each of the Plaintiff’s members also state aesthetic issues with the water’s appearance and smell.

Defendant makes a conclusory statement that Plaintiff has not shown sufficient injury. ECF No. 58-1 at 31 n.28. Defendant attempts to cast Plaintiff’s cited declarations as lacking personal knowledge and offering legal conclusions. ECF No. 60 at 25. The court disagrees. Plaintiff has demonstrated that its members use the affected area, thus have personal knowledge, and that they avoid the area due to aesthetic and health concerns. Plaintiff has demonstrated injury.

b. Traceability

To demonstrate “traceability,” the plaintiff must show “a causal connection between the injury and the conduct complained of [that is] fairly trace[able] to the challenged action of the defendant, and not . . . th[e] result [of] independent action by some third party.” *Id.* In

environmental cases, the plaintiff does not need to “show to a scientific certainty that the defendant’s actions caused the precise harm.” *S.C. Wildlife Fed’n v. S.C. Dep’t of Trans.*, 485 F. Supp. 2d 661, 670 (D.S.C. 2007). A plaintiff “need not show that a particular defendant is the only cause of their injury.” *Nat. Res. Def. Council, Inc. v. Watkins*, 954 F.2d 974 (4th Cir. 1992). However, a plaintiff must demonstrate there are not “independent actors not before the court[] and whose exercise of broad and legitimate discretion the courts cannot presume either to control or to predict.” *Lujan*, 504 U.S. at 560.

First, the harm is traceable to Defendant. Defendant is discharging treated wastewater into the Saluda River. While there may be additional businesses discharging into the Saluda River, Plaintiff’s members specifically noted the area around Defendant’s discharge pipe in their affidavits. *See* affidavits cited *supra* Section III.a.ii.1. This aesthetic injuries are traceable to Defendant. Second, while there is more than one party required to connect the I-20 Plant to the regional system, the harm is still traceable to Defendant. The Permit puts the onus on Defendant to provide a satisfactory agreement for PSC’s approval. The prior denials demonstrate what PSC will find acceptable in a proposed agreement. Further, Defendant has the obligation to contract with Town or take other measures to fulfill the Permit requirements. Defendant has kept its plant open for seventeen years after it was required to connect. While regional connection does require other actors’ assistance and approval, Defendant cannot be rewarded for its lack of a good faith effort to engage in negotiations and receive the required approvals. The court finds that the independent actors’ behavior is sufficiently predictable. The court finds that Plaintiff’s injury is traceable to Defendant’s actions.

granted against defendant FWS would have no impact on the plaintiff's alleged injuries. *Id.*; see *Frank Krasner Enter. Ltd. v. Montgomery Cty.*, 401 F.3d 230 (4th Cir 2005) (finding that third party was not before the court and court could not compel third party to rent space or subsidize plaintiff).

Plaintiff asserts that, as to Claim I, redressability is shown by alleging a continued or imminent violation. ECF No. 57 at 11; see also *Gaston Copper*, 204 F.3d at 154. Defendant argues that an injunction by this court for a sale, connection agreement, eminent domain action, condemnation, or closure of the facility is too speculative or dependent upon third parties to suffice the redressability requirement of standing. Defendant asserts that any agreement for connection requires a contract with Town and PSC approval. Lastly, Defendant asserts that as Town and PSC are not before the court, the court cannot order Town to condemn the property. The court disagrees with Defendant. In *Ferrell Parkway*, there were numerous other actors who needed to take action counter to their stated plans, *i.e.*, the city's sale of the land demonstrated that it did not intend to develop the land. Here, the parties are in negotiations for the connection of the I-20 Plant to the regional system. The court need not compel the parties to take action counter to their stated plans. The court may issue an injunction dictating a specific time to connect to the regional plant that provides sufficient time for Defendant to contract with Town and seek PSC approval. Relief for Plaintiff is not too speculative or dependent upon third parties.

ii. *Civil Penalties*

Plaintiff alternatively requests civil penalties, *i.e.*, monetary relief. "All civil penalties have some deterrent effect." *Hudson v. United States*, 522 U.S. 93, 102 (1997). Civil penalties under the [CWA] do more than incentivize immediate compliance, they also deter future violations. *Laidlaw*, 528 U.S. at 186. Defendant argues standing for civil penalties for Claim I

suffers the same defect as standing for an injunction. Should the court impose a civil penalty on CWS for not connecting and ceasing discharges, Defendant's compliance to avoid future penalties would still be subject to an agreement with various third parties not bound by an order of the court. Defendant has continued to engage in profitable activity, in violation of its permit, for seventeen years. The court finds that an imposition of civil penalties is not inequitable. Such penalties would be an incentive for Defendant to engage in further negotiations with Town. Accordingly, civil penalties would redress Plaintiff's injuries.

The court finds that element "(a)" of standing is met, Plaintiff has demonstrated injury, traceability, and redressability. As to element "(b)," Plaintiff's purpose is "protecting the natural environment and public health." ECF No. 57 at 12. As this matter involves water pollution, it is germane to the association's purpose. As to element "(c)," individual participation is not required as the relief sought is compliance with the NDPES permit, not private damages or injunctions tailored for the individual plaintiff. *Id.* at 12–13. The court finds that Plaintiff meets elements (b) and (c). Plaintiff has organizational standing.

3. *Burford* Abstention

In a footnote, Defendant argues the *Burford* abstention doctrine applies. ECF No. 58-1 at 30 n.27.⁴ *See Palumbo v. Waste Tech. Indus.*, 989 F.2d 156, 160 (4th Cir. 1993) (abstaining where Attorney General should have raised issue on direct appeal or to the Clean Air Act regulatory bodies). *Burford* abstention permits a federal court to dismiss a case only if it presents "difficult questions of state law bearing on policy problems of substantial public import whose

⁴ Defendant is cautioned from making arguments in footnotes, while it saves space, arguments contained within footnotes are generally considered with less force and make briefings difficult to read.

Colorado River Water Conservation Dist. v. United States, 424 U.S. 800, 814 (1976); *see Ohio Valley Envtl. Coal. Inc. v. Maple Coal Co.*, 808 F. Supp. 2d 868 (S.D.W. Va. 2011) (holding that *Burford* does not apply as the issue was whether the West Virginia agency complied with CWA permit modification requirements). Here, similar to *Ohio Valley*, Plaintiff is asserting that DHEC did not comply with CWA permit requirements and accordingly is asserting that Defendant is not complying with the validly issued 1995 Permit. The case does not bear on difficult questions of state law, instead it bears directly on implementation of federal law. Nor is the case disruptive of state efforts to establish a coherent policy regarding NDPES permitting systems. *Burford* abstention does not apply.

The CWA is a strict liability statute. The court must determine which permit applies, the terms of the applicable permit, and whether Defendant violated those terms.

The first issue is whether the Defendant may assert that the terms stated in the 2002 ALC Decision govern whether there was a violation. Plaintiff argues that Defendant cannot argue the 2002 ALC Decision modified Defendant's requirements because Defendant has "consistently and repeatedly admitted in prior filings to this Court that the 1995 Permit is *the* operable permit, and that its language controls liability." ECF No. 59 at 4 (emphasis in original). Plaintiff asserts that under the "law of the case" doctrine, Defendant is prohibited from modifying its argument. ECF No. 59 at 5. Defendant argues that the court's "jurisdiction to entertain citizen suits for alleged violations of NDPES Permits only extends to the terms of the permit which is 'in effect'

The court finds that judicial admission does not apply. Defendant did not explicitly state that the 1995 Permit is the only applicable permit, Defendant merely responded (and denied) the complaint's allegations based on the 1995 Permit, there does not appear to be a clear and unambiguous waiver.

Plaintiff next argues that the 2002 modifications cannot apply because the modifications fail to follow the proper procedure under the CWA. ECF No. 59 at 9. Federal and state regulations govern the modification of NDPES permits.⁵ *See Citizens for a Better Env't-CA v. Union Oil Co. of CA*, 83 F.3d 1111, 1120 (9th Cir. 1996). The applicable regulations require (1) a draft permit, (2) accompanying fact sheet setting forth the factual, legal, and policy questions considered while drafting the permit, (3) public notice and comment period, and (4) the opportunity to request a public hearing. *See* 40 C.F.R. §§ 122.62, 124.5–124.12; S.C. Code Regs.

21

[a]ll draft permits prepared by EPA under this section shall be accompanied by a statement of basis or fact sheet, and shall be based on the administrative record, publicly noticed, and made available for public comment. The Regional Administrator shall give notice of opportunity for a public hearing, issue a final decision, and respond to comments.

Defendant argues that it followed proper state procedures and Plaintiff's argument amounts to an improper collateral attack on state administrative procedures. ECF No. 61 at 8. Defendant attempts to distinguish *Smithfield Foods* and *Citizens for a Better Environment* by asserting that neither defendant had sought a modification order, the terms were changed after

Finally, Defendant asserts that because its modification request was initially denied, it no longer has to comport with the modification requirements of 40 C.F.R. § 124.5: “Denials of requests for modification, revocation and reissuance or termination are not subject to public notice, comment, or hearings.” *See* 40 C.F.R. § 124.5(b). This is inapposite. The regulation merely states that if the permit modification is denied, the issuing body does not need to hold a public hearing. If the permit is going to be denied, it does not change the status quo and public input is unnecessary. However, if there is a modification to the permit, there must be a public hearing (if sufficient public interest). Accordingly, the proper procedure would have Defendant appeal the denial to modify to the Board, the Board overrule the denial and then submit the request to a public notice and comment period. The court finds proper modification procedures were not followed; therefore, the 1995 Permit applies.⁶

i. *Interpretation of 1995 NDPES Permit*

⁶ As the 1995 Permit applies, the court declines to consider whether the 2002 modifications violated the CWA's anti-backsliding rule.

(1) Connect

required to connect to that system.” ECF No. 58-1 (citing ECF No. 7-6 at 44) (emphasis in original).

Looking at the entirety of paragraph 3(c), Plaintiff asserts that the sentence cited by Defendant are “merely explanatory phrases that do not modify the connection requirement.” ECF No. 62 at 4. The court finds Plaintiff’s arguments accurately reflect the terms of the NDPES Permit. Paragraphs 3(a) and 3(b) place the onus on Defendant to seek connection—Defendant is required to submit plans for connection and begin construction of the connection. Further, in 1998, Defendant appeared to understand that the onus was on Defendant to connect, as demonstrated by Defendant seeking and receiving a construction permit in 1998 to connect the I-20 Plant. ECF No. 65-5. Defendant sought the construction permit even though there was no connection agreement in place. *See id.* Defendant’s current argument conflicts with the 208 Plan. The 208 Plan clearly states that temporary facilities, such as Defendant, must “consolidate” with a regional system. DHEC has repeatedly required Defendant to connect to the regional system and cease discharging. There are numerous ways to connect to the facility. The court finds “connect” does not mean on Defendant’s terms, nor does it infer that Defendant will have a continuing role after connection is made.

(2) Available

Plaintiff understands the term “available” to mean physically available. Defendant understands the terms to mean contractually available. In 2000, DHEC charged Defendant with violating the terms of the permit, namely failure to connect to the regional system when it became physically available. *Carolina Water Service*, 2002 ALC Decision at *1. The ALC Court held that the system was not available to Defendant, deferring to CMCOG’s determination that Defendant was in compliance with the NDPES permit. *Id.* at 6. However, the court also found

comply with the applicable requirements, the economic impact of the penalty on the violator, and such other matters as justice may require.

33 U.S.C. § 1319(d). Generally, a fine must be imposed; however, the district court has discretion in the amount fined. *Stoddard v. Western Carolina Regional Sewer Auth.*, 784 F.2d 1200, 1208 (4th Cir. 1986). The court may take into account whether “levying [] statutory penalties would merely diminish the resources available to correct the problems caused by the discharge.” *Id.* The court first considers the seriousness of the violation. The court finds that the sewage discharge is a serious violation. Next, the court calculated the economic benefit Defendant made on the I-20 Plant between 2009 and 2013, which averaged \$689,000 per year. *See* ECF No. 58-8 at 8-11. Third, Defendant has violated its permit for over seventeen years; however, only recently have any person or group undertaken an enforcement action. The last enforcement action ended in 2002. In 1998, Defendant initially attempted to comply with the permit; however, Defendant failed to undertake any attempt to comply with the permit between 2002 and 2014. Lastly, Defendant will need to undertake costs to correct the problems caused by its failure to fulfill the permit requirements. Taking the above into consideration, the court orders a fine in the amount of \$1,500,000.

B. Claim III: Violation of Effluent Limitations

Plaintiff moves for summary judgment on Claim III. The court finds that there is no genuine issue of material fact that Defendant violated its effluent limitations twenty-three times since 2009.⁷ However, Defendant argues there is a genuine issue of material fact whether Defendant qualifies for an “upset defense.” An upset defense is an affirmative defense for

⁷ Defendant exceeded its effluent limitations February 2009 (1), April 2009 (1), June 2009 (1), April 2010 (2), September 2010 (1), April 2011 (3), September 2011 (1), February 2012 (1), April 2012 (1), August 2012 (1), January 2013 (1), February 2013 (1), April 2013 (3), May 2013 (1), July 2013 (1), August 2013 (1), February 2014 (1), January 2015 (1), October 2015 (1), and November 2015 (1). ECF Nos. 1-3; 57-8 at 6; 57 at 22.

liability for noncompliance with an NDPES permit requirement. Defendant has the burden of proof to show:

[A]n exceptional incident in which there is unintentional and temporary noncompliance with technology based permit effluent limitations because of factors beyond the reasonable control of the permittee. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventative maintenance, or careless or improper operation.

40 C.F.R. § 122.41(n)(1); S.C. Code Ann. Regs. 61-9.122.41(n)(1). To claim a defense of upset, the Defendant must show compliance with the oral notice or written submission requirements.

S.C. Code Ann. Regs 61-9.122.41(n). South Carolina requires oral notice to DHEC within twenty-four hours and a detailed written submission within five days. S.C. Code Ann. Regs. 61-9.122.41(l)(6)(i). Specifically, the Defendant must demonstrate:

Through properly signed contemporaneous logs, or other relevant evidence that:

- (i) An upset occurred and that the permittee can identify the cause(s) of the upset;
- (ii) The permitted facility was at the time being properly operated; and
- (iii) The permittee submitted notice of the upset as required in paragraph (l)(6)(ii)(B) of this section (24 hour notice).
- (iv) The permittee complied with any remedial measures required under paragraph (d) [(duty to mitigate harm)] of this section.

S.C. Code Ann. Regs. 61-9.122.41(n)(3). The notice submitted to DHEC shall include (1) description of noncompliance and its cause, (2) period of noncompliance, including exact dates and times, (3) if noncompliance has not been corrected, the anticipated time it is expected to continue; and (4) steps to reduce, eliminate, and prevent reoccurrence. S.C. Code Ann. Regs. 61-9.122.41(l)(6). The written report may be waived by DHEC if an oral report is received within twenty-four hours. *Id.*

Plaintiff argues that Defendant did not follow proper procedures; therefore, cannot assert an upset defense. Defendant stated that its monitoring procedures consist of: (1) third party

testing, (2) if there's an effluent violation the "operator of the I-20 Plant fills out an excursion report noting any known condition that may have contributed to the exceedance," (3) takes steps to correct the exceedance, and (4) reports the exceedances on the monthly reports submitted to DHEC. ECF No. 60-3 at ¶ 6. If the exceedance is ongoing and poses a threat to public health, Defendant will immediately report to DHEC. *Id.* Defendant summarized the exceedance explanations submitted to DHEC in the DMRs. *Id.* Defendant alleged issues with high algae bloom, seasonal turnover, defective "sonic unit," excessive rainfall, extreme winter weather conditions, and maintenance to the sewer main. *Id.* at ¶ 8. Defendant has not shown that it met the requirement to report in twenty-four hours/five days. As Defendant fails to show there is a genuine issue of material fact that it met reporting requirements to claim an upset defense, the court grants Plaintiff's motion for summary judgment on Claim III. As explained above, CWA is a strict liability statute. For each effluent violation, Defendant is fined \$1,000, totaling \$23,000.

IV. CONCLUSION

Based on the foregoing, Plaintiff's motion for summary judgment **is granted**. Defendant's motion for summary judgment **is denied**. For the reasons stated above, the court fines Defendant \$1,500,000 for Defendant's failure to connect to the regional system and \$23,000 for Defendant's violation of the effluent limitations, totaling \$1,523,000. The fine shall be paid to the United States Treasury. *Gwaltney of Smithfield Ltd.*, 484 U.S. at 53 (finding that "[i]f a citizen prevails in such an action, the court may order injunctive relief and/or impose civil penalties payable to the United States Treasury. [33 U.S.C.] § 1365(a).")

GOOD CAUSE HAVING BEEN SHOWN THEREFORE, IT IS ORDERED that effective April 1, 2018, Defendant Carolina Water Service, Inc. a South Carolina Corporation, its directors, principals, officers, agents, servants, employees, representatives, successors, and

assigns, and all those acting in concert or participation with them shall be, and hereby are,

PERMANENTLY ENJOINED and restrained from:

- (1) discharging any treated or untreated waste water into the Saluda River; and
- (2) must connect to a regional waste water treatment plant, in any manner, in

accordance with the 208 Plan.

s/ Margaret B. Seymour

**IN RE: CAROLINA WATER SERVICE, INC.
FRIARSGATE SUBDIVISON
LEXINGTON COUNTY**

16-039-W

Following approved procedures and based upon discussions with representatives for CWS on August 19, 2016, and without admission by CWS of the allegations contained herein, in order to resolve the matter expeditiously, the Parties have agreed to the issuance of this Order.

1. CWS owns and is responsible for the proper operation and maintenance of the WWTF serving the residents of the Friarsgate Subdivision located in Lexington County, South Carolina.
2. The Department issued NPDES Permit SC0036137 (NPDES Permit) to CWS, authorizing the discharge of properly treated wastewater to the Saluda River, in accordance with the effluent limitations, monitoring requirements, and other conditions

set forth therein.

3. Part 1A of the NPDES Permit establishes the following effluent limitations for fecal coliform: The facility is required to monitor and report results for Fecal Coliform weekly. The NPDES Permit limits are two hundred (200) colonies per one hundred (100) milliliters (monthly average) and 400 colonies per one hundred (100) milliliters (daily maximum).
4. Investigations by the Department, including water quality sampling on June 13, 2016, and June 15, 2016, revealed elevated levels of bacteria at the Friarsgate WWTF discharge pipe in the Saluda River and the effluent discharge at the Friarsgate WWTF. Additional water quality samples were collected in the Saluda River and at the Friarsgate WWTF during June 2016.
5. Sample results of the investigation during June 2016 are as follows:
Bacteriological Sample Results at the WWTF and in Saluda River:
(reported in colonies per 100 milliliters)

Date	Parameter	Sample Station		
		Friarsgate 001 at WWTF after all treatment	007 after UV banks	002A Friarsgate discharge in the Saluda River
6/13/16	Escherichia coli	N/A	> 2419.6	866.4
6/20/16	Fecal Coliform	> 4839.2	N/A	N/A
6/21/16	Fecal Coliform	1597	N/A	N/A
6/23/16	Fecal Coliform	> 24196	< 10	N/A
6/24/16	Fecal Coliform	602	10	976.8
6/25/16	Fecal Coliform	471	31	334
6/26/16	Fecal Coliform	987	1	920.8
6/27/16	Fecal Coliform	6488	< 1	1376

6/28/16	Fecal Coliform	878	1	332
6/29/16	Fecal Coliform	2098	< 1	N/A
6/30/16	Fecal Coliform	2481	140.1	N/A

6. On August 1, 2016, the Department received the discharge monitoring report (DMR), submitted by CWS for the June 2016 monitoring period, which reported violations of the Fecal limits in the NPDES Permit.
7. On August 19, 2016, Department Staff conducted an enforcement conference to discuss the above findings with Mr. Bob Gilroy, Vice President of Operations, Carl Roberts, Haynsworth Sinkler Boyd, and Jimmy Holland, WK Dickson Engineering, appearing for CWS. The issuance of a Consent Order possibly containing civil penalties was discussed.
8. CWS reported violations of limits for Fecal in the NPDES permit on a DMR submitted to the Department for the July 2016 monitoring period. The DMR was received on August 31, 2016.

CONCLUSIONS OF LAW

Based upon the above Findings of Fact, the Department reaches the following Conclusions of Law:

1. CWS violated the Pollution Control Act, S.C. Code Ann. § 48-1-110 (d) (Supp. 2015) and Water Pollution Control Permits, 3 S.C. Code Ann. Reg. 61-9.122.41 (a) and (d) (2014), in that it failed to comply with the effluent limits for Fecal contained in its NPDES Permit.
2. The Pollution Control Act, S.C. Code Ann. § 48-1-330 (Supp. 2015), provides for a civil penalty not to exceed ten thousand dollars (\$10,000.00) per day of violation for any

NOW, THEREFORE, IT IS ORDERED, CONSENTED TO AND AGREED, pursuant to the Pollution Control Act, S.C. Code Ann. § 48-1-50 (Supp. 2015) and § 48-1-100 (Supp. 2015), that CWS shall:

1. Within ninety (90) days of the execution date of this Order, submit to the Department three (3) copies of a Corrective Action Plan (CAP), to include a schedule of implementation, reporting the corrective actions that have been taken and any corrective actions planned to adequately address the potential sources contributing to the Fecal violations. The schedule of implementation shall have specific dates or timeframes for the completion of any planned actions and details as to how each action effectuates compliance with the effluent discharge limits of NPDES Permit SC0036137. The schedule for implementation of specific corrective action steps proposed under the CAP shall be evaluated and, upon Department approval, the schedule(s) shall be incorporated into and become an enforceable part of this Order.
2. Within thirty (30) days of the execution date of this Order submit to the Department an updated Operation and Maintenance (O&M) Manual with standard operating procedures (SOPs) and checklists for the operation of all aspects of the WWTF treatment processes and sludge management, to include at a minimum, process control observations, testing schedules, bench sheets, log entries, etc. as prescribed by a S.C. Registered Professional Engineer. The O&M Manual shall be reviewed and approved by the Department. Upon Department approval the updated O&M Manual shall be implemented by CWS.
3. Continue to conduct sampling of the WWTF final effluent for fecal coliform on a daily

basis until notified otherwise in writing by the Department. CWS may request approval from the Department to resume the sampling interval provided in the Permit at any time subsequent to thirty (30) days after the execution date of this Order. Provide the results (laboratory reports) to the Department via email within twenty four (24) hours after CWS' receipt of reports. Notify the Department via telephone within four (4) hours of becoming aware of an exceedance of fecal limits. During normal working hours call (803)-898-4300. After hour reporting should be made to the Department's 24 hour Emergency Response telephone number (803)-253-6488.

4. Modify the Comprehensive Process Control Testing and Evaluation Program to include, at a minimum, the following determinations:
- a) Settleometer tests (SSV₅ and SSV₃₀)/daily.

b) Sludge blanket depths in individual clarifiers/at least twice per day (a.m./p.m.).

c) Dissolved oxygen profile throughout individual aeration basin/twice per day.

d) Microscopic examination/at least once per week.

e) Mixed Liquor Suspended Solids (MLSS) and Mixed Liquor Volatile Suspended Solids (MLVSS) in individual aeration basins/at least two times per week.

f) Select and utilize at least one of the following most commonly used activated sludge process control techniques:

Control Technique	Frequency	Determination
F:M	3/week	Based on 5 day moving average.
MLVSS	3/week	Volatile solids inventory.
SVI	2/month	
MCRT	3/week	Based on 3-5 day moving ave.
SRT	2/month	
F:M	=	Food to Microorganism Ratio
MLVSS	=	Mixed Liquor Volatile Suspended Solids

DOCKET NUMBER: 2017-292-WS-130-AM 1 80PSC FSC 6k 2022 2023 W/Bag 49 65 66 67 77

SVI = Sludge Volume Index
MCRT = Mean Cell Residence Time
SRT = Sludge Retention Time

- g) Influent, effluent, return sludge, and waste activated sludge flow rates (gpd or mgd)/daily.
- h) Return activated sludge and waste activated sludge concentrations (mg/L) and loading (lbs)/at least three times per week.
- i) Influent pH, biochemical oxygen demand (BOD), and total suspended solids (TSS) at the frequency required by the permit, and add ammonia monitoring at frequency of twice per week.
- j) Effluent pH, dissolved oxygen, BOD and TSS at the frequency required by the permit, and add ammonia monitoring at frequency of twice per week.
- k) Rainfall/daily.
- l) Prepare a table of all determinations obtained from a) – k) above for the calendar month with the exception of microscopic examinations [d) above] which should be recorded on separate worksheets detailing relative predominance of organisms.
- m) Develop trend charts for those tests or parameters which provide the most useful plant performance information on which to base control decisions.

Prepare a written summary report of interpretations of required process control determinations a) – k) and subsequent process adjustment decisions and/or corrective actions based on these interpretations.

Submit to the Department, on a monthly basis, items l) and m) beginning the month following the execution date of this Order, to be postmarked no later than the 28th day of the month following the reporting period.

- 5. Within thirty (30) days from the execution date of this Order, submit to the Department a project timeline for CWS to remove and properly dispose of the solids and grit from the

6. For a period to be determined by the Department, but no later than the term of this order, begin utilizing the services of an independent laboratory to conduct sampling activities required in the NPDES Permit.
7. For a period to be determined by the Department, but no later than the term of this order, utilize the services of an independent certified operator, under the direction of a S.C. Registered Professional Engineer, to operate the WWTF.
8. Within thirty (30) days of the execution date of this Order, submit a staffing plan to address adequate operations and maintenance at the facility. Once approved by the Department, implement the staffing plan.
9. Within thirty (30) days of the execution date of this Order, provide a report of any chemicals, polymers, or bioremediation enzymes that may have been added (with prior Department approval) including time, date, location and quantity as well as any impact on the treatment plant performance.
10. Within thirty (30) days of the execution date of this Order, submit a recommendation for cleaning and maintenance of the UV system, the bulb replacement schedule, the sleeve cleaning schedule, and recording transmittance. Once approved by the Department, CWS shall implement the UV maintenance schedule.
11. Within ninety (90) days of the execution date of the Order, pay to the Department a civil penalty in the amount of seventy eight thousand nine hundred forty dollars (\$78,940.00).

7

Paul F. Wise
Water Pollution Control Division
South Carolina DHEC
2600 Bull Street
Columbia, S.C. 29201

The order number should be included on all checks remitted as payment of the civil penalty.

IT IS FURTHER ORDERED AND AGREED that failure to comply with any provision of this Order shall be grounds for further enforcement action pursuant to the Pollution Control Act, S.C. Code Ann. § 48-1-330 (2015), to include the assessment of additional civil penalties.

IT IS FURTHER ORDERED AND AGREED that CWS does not admit any of the allegations, including Findings of Fact and Conclusions of Law, contained in this Order, but that CWS is entering into this Order in order to expeditiously resolve the issues referenced herein.

IT IS FURTHER ORDERED AND AGREED that CWS may request amendment of this Consent Order, and this Order may be amended as agreed to by the parties.

IT IS FURTHER ORDERED AND AGREED that this Consent Order governs only the civil liability to the Department for civil sanctions arising from the matters set forth herein and constitutes the entire agreement between the Department and Carolina Water Service, Inc. with respect to the resolution and settlement of these civil matters. The parties are not relying upon any representations, promises, understandings or agreements except as expressly set forth within this Order.

**THE STATE OF SOUTH CAROLINA
BEFORE THE DEPARTMENT OF HEALTH AND ENVIRONMENTAL CONTROL**

IN RE: CAROLINA WATER SERVICE, INC.
FRIARSGATE SUBDIVISION
LEXINGTON COUNTY

CONSENT ORDER

17-060-W

Carolina Water Service, Inc. (CWS) owns and is responsible for the proper operation and maintenance of the wastewater treatment facility (WWTF), located off of Irmo Drive, and the associated wastewater collection system (WWCS), serving the residences of Friarsgate Subdivision, in Lexington County, South Carolina.

CWS discharged untreated wastewater, as result of sanitary sewer overflows (SSOs) from the WWCS into the environment in a manner other than in compliance with a permit issued by the South Carolina Department of Health and Environmental Control (Department). CWS failed to properly operate and maintain the WWCS in accordance with its National Pollutant Discharge Elimination Permit System (NPDES) Permit. CWS verbally reported sewer system overflows (SSOs) to the Department, but failed to submit written reports for the SSOs to the Department in a timely manner.

Based upon discussions with agents for CWS on May 15, 2017, and in the interest of resolving this matter without the delay and expense of litigation, CWS agrees to the entry of this Consent Order, but neither agrees with nor admits to any statements, conclusions, claims or the Findings of Fact or the Conclusions of Law in this Order, but agrees to the requirements stated in this Order.

FINDINGS OF FACT

1. CWS owns and is responsible for the proper operation and maintenance of the WWTF located in Lexington County, South Carolina.
2. The Department issued NPDES Permit SC0036137 (NPDES Permit) to CWS, authorizing the discharge of properly treated wastewater to the Saluda River, in accordance with the effluent limitations, monitoring requirements, and other conditions set forth therein.
3. CWS reported the following SSOs to the Department during 2015 and 2016. The dates, locations, volumes of wastewater released and cause of the SSO are described below. It is also noted that historic rains and flooding in early October 2015 caused issues for numerous facilities in the Midlands and throughout the State.
 - a) Between December 22-24, 2015, heavy rains impacted some storm drains and manholes. CWS states that precipitation during this period totaled approximately five (5) inches, according to the WWTF rain gauge.
 - December 22, 2015: Backyard of 101 and 97
Chadford Road 7,400 gallons - heavy rain
 - December 22, 2015: Plant Control Chamber 131
Greenbriar Drive 4,500 gallons - heavy rain
 - December 23, 2015: Manhole Backyard of 101 and 97
Chadford Road 400 gallons - heavy rain
 - December 24, 2015: Manhole Backyard of 101 & 97
Chadford Road 2,000 gallons - heavy rain
 - b) February 24, 2016: Manhole 313
Brickling Road 2,000 gallons -blocked sewer line

- 3

Brashears, WK Dickson Consulting, and Carl Roberts, Haynsworth Sinkler Boyd, present representing CWS. Mr. Gilroy discussed the current plans by CWS to address the Infiltration/Inflow in the Friarsgate Subdivision WWCS. The issuance of a Consent Order, possibly containing civil penalties, was discussed.

9. On May 22, 2017, Department Staff visited the WWTF in response to an odor complaint. During the visit, the Department inspector observed that the influent at the WWTF was temporarily being diverted to the equalization basin. The Department inspector also reported that the rainfall measured at the WWTF from a rainfall event the previous day was one and three quarters (1.75) inches.

CONCLUSIONS OF LAW

Based upon the above Findings of Fact, the Department reaches the following

Conclusions of Law:

1. CWS violated the Pollution Control Act, S.C. Code Ann. § 48-1-90(A)(1) (Supp. 2016), in that it discharged untreated or partially treated wastewater into the environment in a manner other than in compliance with a permit issued by the Department.
2. CWS violated the Pollution Control Act, S.C. Code Ann. § 48-1-110 (d) (Supp. 2016), and the NPDES Permit, in that it failed to report Sewer System Overflows to the Department as required by the Permit.
3. The Pollution Control Act, S.C. Code Ann. § 48-1-330 (2008), provides for a civil penalty not to exceed ten thousand dollars (\$10,000.00) per day of violation for any person violating the Act or any rule, regulation, permit, permit condition, final determination, or Order of the Department.

1. Beginning on the effective date of this Order and continuing until the Order is closed, report to the Department wastewater spills from the WWCS as required by law, verbally within twenty-four (24) hours and in writing on the DHEC SSO Report Form, DHEC 3685 (02/2000), within five (5) days.
2. Beginning with the effective date of this Order, submit to the Department copies of public notices issued by CWS for all significant spills, as defined by S.C. Code Ann. § 48-1-95(A)(5) (Supp. 2016), from the WWCS.
3. CWS shall develop and implement the Sewer Overflow Response Program and the WWCS Training Program as set forth below, and ensure that each program has a written, defined purpose; a written, defined goal; is documented in writing with specific detail as required herein; is implemented by trained personnel; has established performance measures; and, has written procedures for periodic review.

5

(i) The SORP shall provide CWS personnel a series of standard operating procedures with step-wise instructions for how to:

A. Report to SCDHEC the location of SSOs by street address or any other appropriate method (i.e., latitude-longitude) within twenty four (24) hours from the time Defendant becomes aware of the circumstances, in accordance with current laws, regulations and policies, and consistent with CWS's NPDES Permit;

B. Provide written reporting to SCDHEC in accordance with current laws, regulations and policies, and consistent with CWS's NPDES Permit;

C. Maintain records including all written reports to SCDHEC; maintain records documenting steps that have been and will be taken to prevent the SSO from recurring, including work order records associated with investigation and repair activities; and maintain a list of complaints from customers or others with the reported details regarding individual SSOs and their responses that can be used for trend analysis;

D. In accordance with current laws, regulations and policies, and consistent with CWS's NPDES Permit, provide notice to the public of significant SSOs through the local news media or other means, including, as appropriate, signs or barricades to restrict access;

E. Estimate the volume of untreated wastewater released by a SSO, and to minimize the volume released;

F. Take emergency procedures for specific pump stations, install bypass/ pump-around strategies, and other means to prevent the exceedance of a pump station's storage capacity (i.e., maximum volume of sewage that can be stored in the event of a pump station failure or repair without causing a SSO and the time during

which sewage can be stored before a SSO will occur);

G. Determine (i) when additional storage or a pump-around strategy will be needed in the event that a repair may cause or lengthen the time of a SSO; and,

(ii) The SORP shall specify the procedures and frequencies necessary to provide adequate training for CWS's employees, and contractors required to effectively implement the SORP and its standard operating procedures.

b. WWCS Training Program. Within nine (9) months of the effective date of this Consent Order, CWS shall submit to DHEC for review, comment, and approval a WWCS Training Program (Program). CWS shall develop the Program by evaluating the personnel, tasks, equipment, and facilities associated with the operation and maintenance of CWS's WWCS. The Program shall include, and CWS shall implement, upon Department approval:

(i) General Training. CWS shall provide general training to address tasks undertaken by CWS's WWCS personnel. General training would include, for example, employee orientations, training in the basic principles of wastewater collection and transmission, and training in the rules and regulations affecting CWS's WWCS personnel. The general training component of the Program shall provide the content of the initial training, and the frequency and content of the refresher training, to be required for all personnel responsible for management, operations, or maintenance of CWS's WWCS.

(ii). Position Specific Training. CWS shall provide training for tasks undertaken by CWS's WWCS personnel to address the methods, processes, procedures, and techniques required to perform the duties and tasks necessary for the proper operation and maintenance of the collection and transmission

system. Collection system training would include, as appropriate, training in equipment operation, pipe installation and replacement, pipe cleaning, pipe inspection, and reading as-built drawings. Transmission system training would include, as appropriate, training in equipment operation, pump/ejector inspection, pump/ejector maintenance, and pump/ejector repair. CWS's collection system training and transmission system training program shall include:

- (A) identification of the related tasks, equipment, and facilities;
- (B) description of the technical knowledge necessary to properly conduct the individual tasks and properly operate the individual equipment and facilities;
- (C) description of the underlying purposes and technical reasons for conducting the individual tasks or operating the individual equipment and facilities;
- (D) standard procedures which personnel shall follow when conducting the individual tasks or operating the individual equipment and facilities;
- (E) the content of the initial training, and the frequency and content of the refresher training, to be required for personnel conducting the individual tasks, or operating the individual equipment and facilities; and
- (F) training designed to provide trainees with a thorough understanding of the individual procedures, underlying technical reasons, and underlying purposes associated with the individual tasks they may conduct, or the specific equipment and facilities they may operate, and to

provide this in a consistent manner to all trainees.

(iii) Tracking. The Training Program shall include a description of the common data management system to be used for tracking personnel

participation in, and completion of, the initial general training, collection system training, and/or transmission system training, and the corresponding refresher training.

(iv) Implementation Schedule. The Training Program shall include an implementation schedule specifying dates and actions related to training activities.

4. Immediately, upon the effective date of this Order, begin conducting a capacity, management, operations and maintenance (cMOM) audit (Audit) of the Friarsgate Subdivision WWCS to include, but not be limited to:

- a) financial plans detailing current and planned capital improvement projects in the WWCS and how operation and maintenance of the WWCS will be funded;
- b) personnel charts, including job assignments;
- c) lift station inspection and maintenance schedules;
- d) a sewer inspection and cleaning program;
- e) Inflow/Infiltration evaluations;
- f) manhole inspections;
- g) detailed logs/records of daily operations;
- h) easement/right-of-way maintenance programs;
- i) easement/right-of-way maintenance;
- j) a spare parts inventory; and,

- k) any other components necessary for proper operation and maintenance of the WWCS.

The Audit shall include a comprehensive review of the WWCS. The review must include a complete technical assessment of the components and operation of the

WWCS that are contributing to, or may be contributing to spills of untreated or partially treated domestic sewage. The review must be performed by a licensed South Carolina registered professional engineer.

5. Within ninety (90) days of beginning the Audit review, submit to the Department a report of the Audit findings, a corrective action plan (CAP) and a schedule of implementation to address priority deficiencies identified in the WWCS (pump stations, manholes, line breaks/deterioration, etc.) during the Audit. The CAP shall include a map of the WWCS, indicating the location of corrective actions that have been implemented and corrective actions that are planned based on the Audit, along with details as to how each corrective action item remedies deficiencies within the WWCS. The schedule of implementation shall include specific dates or timeframes for the completion of each action and/or maintenance activity. The CAP's schedule, upon approval by the Department, shall be incorporated into and become an enforceable part of this Order.
6. Within two hundred forty (240) days of the effective date of this Order and based on the findings of the WWCS Audit, finalize a comprehensive management plan (cMOM Plan), covering operations, maintenance and management of the collection system. Submit the cMOM Plan to the Department.
7. Within ninety days (90) days of the effective date of this Order and every ninety (90) days thereafter until this Order is closed, submit to the Department a summary of corrective actions addressing deficiencies in the WWCS. The summary report(s) shall include a map of the WWCS, indicating the location of corrective actions.

8. Within thirty (30) days of the execution date of the Order, pay to the Department a civil penalty in the amount of twelve thousand dollars (\$12,000.00).

PURSUANT TO THIS ORDER, communications regarding this Order and its requirements,

including civil penalty payments, shall be addressed as follows:

Paul F. Wise
Water Pollution Control Division
South Carolina DHEC
2600 Bull Street
Columbia, S.C. 29201

The order number should be included on all checks remitted as payment of the civil penalty.

IT IS FURTHER ORDERED AND AGREED that failure to comply with any provision of this Order shall be grounds for further enforcement action pursuant to the Pollution Control Act, S.C. Code Ann. § 48-1-330 (2008), to include the assessment of additional civil penalties.

~~IT IS FURTHER ORDERED AND AGREED~~ that this Consent Order governs only the civil liability to the Département for civil sanctions arising from the matters set forth herein and constitutes the entire agreement between the Department and Carolina Water Service, Inc. with respect to the resolution and settlement of these civil matters. The parties are not relying upon any representations, promises, understandings or agreements except as expressly set forth within this Order.

THE PARTIES UNDERSTAND that the "execution date" of this Order is the date the Order is signed by the Director of Environmental Affairs.
